

ANTON GORPINCHENKO

Frontend Developer

+7 921 984-27-98 | anton_gor1994@mail.ru | Telegram: @a_gorpin | GitHub: github.com/Gorpinchenko

PROFESSIONAL SUMMARY

Frontend Developer with 8+ years of commercial web development experience. Primary stack: TypeScript, JavaScript, Vue.js and Nuxt.js, with commercial React experience. Specialized in complex product interfaces, frontend architecture, performance optimization, Core Web Vitals, build performance and gradual modernization of large legacy applications. Strong full-stack background enables effective work across APIs, databases and infrastructure when needed. Regularly contribute to code reviews and technical decisions and step into Team Lead responsibilities when required.

TECHNICAL SKILLS

TypeScript, JavaScript, Vue.js, Vue 2/3, Nuxt 2/3, React, Next.js, Vuex, Pinia, Composition API, HTML5, CSS3, SCSS, REST API, Axios, Webpack 4, Vite, Jest, Git, GitHub Actions, CI/CD, Docker, SSR, Core Web Vitals, Performance Optimization, Frontend Architecture, Claude Code, AI Coding Agents

PROFESSIONAL EXPERIENCE

Conjointly - Frontend Developer

Jul 2023 - Present | SaaS platform for market research and conjoint analysis

- Develop and evolve a large TypeScript/Vue/Nuxt application with complex product interfaces, frontend architecture, performance work and gradual modernization of a legacy codebase.
- **Reduced JavaScript bundle size by ~33%** on Webpack 4 through code splitting/chunk optimization, dependency cleanup and replacement of heavyweight libraries.
- **Improved Core Web Vitals and moved LCP from the red to the green range** by optimizing application/resource loading, requests, caching and runtime issues.
- **Reduced incremental build time from 20-60 seconds to a few seconds** on a large legacy Webpack 4 application.
- Contributed to migration from a legacy iframe/Vue architecture to Nuxt, moving 10+ research configuration sections and extracting business logic into services and repositories.
- Developed architecture and functionality for a survey builder supporting 20+ question types, including validation, drag-and-drop, complex state management and REST API integration.
- Built the frontend for a new Implicit Test research type: drag-and-drop editor, settings and validation, desktop/mobile UI, keyboard interactions and localization for ~40 languages.
- Integrated and adapted an open-source presentation editor and implemented data-driven presentation generation from analytical reports.
- Regularly perform Code Review and contribute to architecture and technical decisions. Repeatedly took over Team Lead responsibilities during team leads' absence, including for another team.
- Initiated the team's transition to Claude Code and agent-based development; AI coding agents became a standard part of the team's workflow.
- Received the highest possible **Excellent** rating in the last four consecutive semiannual performance reviews.

Stack: TypeScript, JavaScript, Vue.js, Nuxt.js, Vuex, Webpack 4, Vite, HTML5, CSS3, SCSS, REST API, Axios, Jest, ESLint, Git, GitHub Actions, CI/CD, Docker, CloudFront/S3.

Sovcombank Technologies - Frontend Developer

May 2020 - Jun 2023 | Banking and fintech products

- Developed frontend applications for the Halva mobile bank web version, online banking, partner/promotions website and internal content-management interfaces.
- Initiated adoption of TypeScript and ESLint and improved dependency management and development predictability.
- Participated in architecture and gradual migration from Vue 2 to Vue 3 using Composition API, script setup, dependency injection, Pinia and Vite while product development continued.
- Implemented banking scenarios including currency exchange, recurring payments, subscriptions, document requests, loyalty functionality and an installment calculator.
- Developed frontend functionality involving encryption for secure card-data workflows and PIN changes, and complex financial calculations using decimal.js.
- Worked on product redesign and gradual migration to a new API, and built interfaces with large numbers of interactive map objects.
- Regularly performed Code Review and collaborated with backend developers, QA and designers; participated in releases and supported junior developers.

Stack: TypeScript, JavaScript, Vue 2/3, Vuex, Pinia, Composition API, Vite, Webpack, HTML, CSS/SCSS, REST API, Git, Docker.

AltSuite - Frontend Developer

Dec 2017 - Apr 2020 | Corporate HR analytics and survey platform

- Migrated the frontend from vanilla JavaScript/jQuery to Vue.js, introducing component architecture, Vuex, Vue Router, i18n and Axios-based API integration.
- Built data-heavy analytics interfaces with filtering and comparison, interactive Chart.js/SVG visualizations and PDF/XLS report export.
- Maintained and optimized existing JavaScript functionality and integrations.

Stack: JavaScript, Vue.js, Vuex, Vue Router, Axios, HTML, CSS, Chart.js, jQuery.

EDUCATION

Moscow Technological Institute - Bachelor's degree, Management / Analytical Support for Management Decision-Making, 2018

Saint Petersburg Electrotechnical University "LETI" - Bachelor's degree, Radio Electronics and Telecommunications / Design and Manufacturing of Radio-Electronic Equipment, 2014

ADDITIONAL EDUCATION

School 21 / Ecole 42, 2023 | **GeekBrains** - **Web Development**, 2017

LANGUAGES

Russian - Native | English - B2 (Upper-Intermediate)
