

ANTON GORPINCHENKO

Full-Stack Developer

+7 921 984-27-98 | anton_gor1994@mail.ru | Telegram: @a_gorpin | GitHub: github.com/Gorpinchenko

PROFESSIONAL SUMMARY

Full-Stack Developer with 8+ years of commercial web development experience and particularly strong frontend expertise. Experienced in delivering product functionality end-to-end: application and data design, backend business logic and APIs, frontend architecture and UI, integrations, testing and production support. Core technologies include TypeScript, JavaScript, Vue/Nuxt, React, PHP, SQL and REST APIs. Comfortable working with large legacy systems, performance-sensitive applications, databases, infrastructure and CI/CD.

TECHNICAL SKILLS

TypeScript, JavaScript, Vue.js, Nuxt.js, React, Node.js, PHP, Laravel, Yii2, SQL, Relational Databases, REST APIs, HTML5, CSS3, SCSS, Webpack, Vite, Jest, Git, Docker, GitHub Actions, CI/CD, CloudFront/S3, SSR, Application Architecture, Performance Optimization, Claude Code, AI Coding Agents

PROFESSIONAL EXPERIENCE

Conjointly - Full-Stack Developer

Jul 2023 - Present | SaaS platform for market research and conjoint analysis

- Deliver product functionality across frontend, backend, data and infrastructure for a SaaS market-research platform.
- Built a new **Implicit Test** research methodology end-to-end: data structures, generation/randomization logic, backend services and validation, plus a responsive drag-and-drop frontend localized for ~40 languages.
- Contributed to migration from legacy iframe/Vue architecture to Nuxt, moving 10+ product sections and separating business logic into service/repository layers.
- Developed survey-builder functionality supporting 20+ question types, including business rules, frontend/backend validation, state management, drag-and-drop and REST API integrations.
- **Reduced JavaScript bundle size by ~33%**, moved LCP from the red to the green Core Web Vitals range, and reduced incremental builds from 20-60 seconds to a few seconds.
- Worked on data-quality and anti-fraud mechanisms including VPN/proxy/Tor detection, browser fingerprinting and timing/timezone anomaly checks.
- Integrated an open-source presentation editor with the platform and analytical reports for data-driven presentation generation.
- Worked with Webpack, Vite, TypeScript tooling, GitHub Actions, Docker, CI/CD and CloudFront/S3 caching.
- Regularly perform Code Review and contribute to architecture and technical decisions. Repeatedly took over Team Lead responsibilities during team leads' absence, including for another team.
- Initiated adoption of Claude Code and agent-based development across the team; received **Excellent**, the company's highest rating, in the last four consecutive semiannual reviews.

Stack: TypeScript, JavaScript, Vue.js, Nuxt.js, PHP, SQL, REST APIs, Webpack, Vite, Docker, GitHub Actions, CI/CD, CloudFront/S3.

Sovcombank Technologies - Frontend Developer

May 2020 - Jun 2023 | Banking and fintech products

- Developed frontend applications for the Halva mobile bank web version, online banking, partner/promotions website and internal content-management interfaces.
- Initiated adoption of TypeScript and ESLint and improved dependency management and development predictability.
- Participated in architecture and gradual migration from Vue 2 to Vue 3 using Composition API, script setup, dependency injection, Pinia and Vite while product development continued.
- Implemented banking scenarios including currency exchange, recurring payments, subscriptions, document requests, loyalty functionality and an installment calculator.
- Developed frontend functionality involving encryption for secure card-data workflows and PIN changes, and complex financial calculations using decimal.js.
- Worked on product redesign and gradual migration to a new API, and built interfaces with large numbers of interactive map objects.
- Regularly performed Code Review and collaborated with backend developers, QA and designers; participated in releases and supported junior developers.

Stack: TypeScript, JavaScript, Vue 2/3, Vuex, Pinia, Composition API, Vite, Webpack, HTML, CSS/SCSS, REST API, Git, Docker.

AltSuite - Full-Stack Developer

Dec 2017 - Apr 2020 | Corporate HR analytics and survey platform

- Worked across frontend and backend on a corporate HR analytics and survey platform.
- Migrated the frontend from vanilla JavaScript/jQuery to Vue.js and built complex analytics interfaces, visualizations and report export.
- Worked with PHP/Yii2 backend functionality, relational databases, SQL, API integrations and application maintenance.

Stack: JavaScript, Vue.js, jQuery, PHP, Yii2, SQL, REST APIs, HTML, CSS, Chart.js.

EDUCATION

Moscow Technological Institute - Bachelor's degree, Management / Analytical Support for Management Decision-Making, 2018

Saint Petersburg Electrotechnical University "LETI" - Bachelor's degree, Radio Electronics and Telecommunications / Design and Manufacturing of Radio-Electronic Equipment, 2014

ADDITIONAL EDUCATION

School 21 / Ecole 42, 2023 | **GeekBrains - Web Development**, 2017

LANGUAGES

Russian - Native | English - B2 (Upper-Intermediate)
